

Class C & D Conversion Subframe

Experience that Matters

Champion Hoist and Equipment™ has a low tolerance for defects and a strong desire for quality craftsmanship to ensure customer satisfaction. Dedicated to perfection and continuing to lead the industry with years of excellence, Champion built hoists are well developed and industry proven. We are a proud member of the National Truck Equipment Association and the National Association of Trailer Manufacturers.

This hoist was designed with installers in mind.

When purchased, this unit arrives fully assembled with loose mounting brackets. The class C & D conversion subframe has many installation time saving features designed save you time and money.

Champion built conversion hoists cylinders are double acting (power up and power down). Our hoists are easy to install with as little frame and body modification as possible. To further ease the installation process, Champion hoists are welded to the body and bolted to the chassis using heavy duty grade 8 bolts.
